

ViewCompanion Standard 9.0 Released

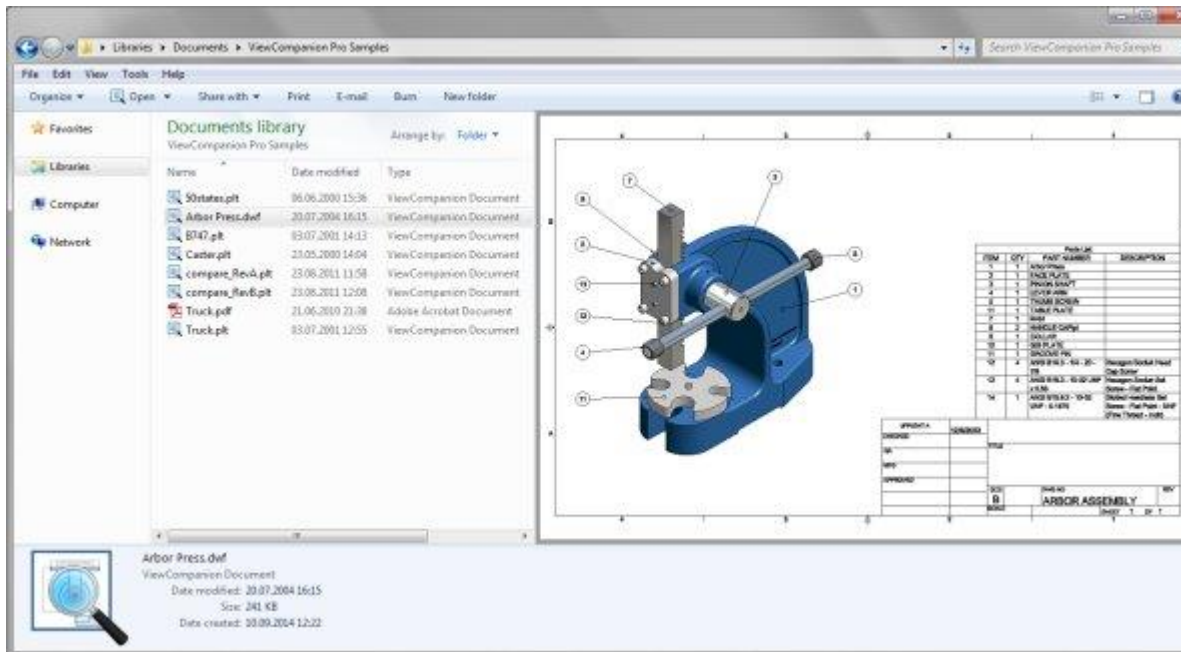

New features and viewing of Adobe PDF files added

OSLO, Norway, September 15, 2014 - This update adds new features and support for viewing and printing of **Adobe PDF** files. You can now use ViewCompanion Standard to view and print all your PDF files. The **shell extension** now displays a full preview of all supported file formats inside Windows Explorer.

This update is 100% free if you purchased a ViewCompanion license, or renewed the software maintenance, less than 12-months ago.

What's new in 9.0?

- Added support for reading **Adobe PDF** files.
You can now use ViewCompanion to view and print your PDF files.
- The improved [Shell Extension](#) can display a full preview of the selected file inside Explorer. A new tool is included for associating file types with ViewCompanion and the Shell Extension.
Full preview inside Windows Explorer of a DWF file can be seen in the screenshot below:

- Added **JPEG-2000** as new export format.
- Added **Movie Maker**, a new tool for creating an AVI movie from supported file types. Each file and page is converted to a single frame in the movie (frame length is configurable).

- A few other minor improvements and changes.
- Several bugs fixed.
